**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark G. Kachigian (Reg. No. 32,840) on January 03, 2011.

2. The application has been amended as follows (**please refer to Amendments after non-Final, mailed 01/27/10**):

**In claim 1**, line 2, please insert "...a..." after "...to..."

**In claim 1**, line 7, please insert "...said..." after "...of..."

**In claim 1**, line 11, please delete "...a user..." and insert "...said user..." before "...selecting..."

**In claim 1**, line 13, please insert "...said..." after "...of..."

**In claim 1**, line 18, please insert "...said..." after "...with..." and insert "...plus a same tolerance percentage value..." after "...frame..."

***Allowable Subject Matter***

3. Claims 1, 2 and 5-12 are allowed.

4. The following is an examiner's statement of reasons for allowance: with respect to independent claims 1 and 11 of the instant invention is directed to a method

for generating and processing data for the display of a stream of video data on a display screen connected to a data processing apparatus; and a method of generating a video display in a first standard motion picture group format and a second user selectable fast forward of fast cue format. The most relevant prior art of record, **Zdepski et al (6,445,738)** disclose system and method for creating trick play video streams from a compressed normal play video bitstream. **Van Den Enden (5,799,128)** discloses storage and retrieval of a data reduced digital video signal in/from a memory and recording and reproduction of a data reduced digital video signal on a longitudinal record carrier. **Keller et al (7,023,924)** disclose method of pausing an MPEG coded video stream. **Van Asten et al (6,879,770)** disclose method of reverse playback of MPEG video stream. **Boyce et al (6,023,553)** disclose method and apparatus for achieving video data reduction through the use of re-encoding. However, neither **Zdepski, Van Den Enden, Keller, Van Asten nor Boyce** and any of the cited references teach or suggest alone or in combination the feature of "...changing the required level of said video data to be held in said buffer memory for the altered format to a second threshold level; wherein at the second threshold level the buffer memory substantially accommodates no more video data corresponding to a single I frame, plus a small tolerance percentage value; filling the buffer memory with said video data corresponding to a single I frame plus the small tolerance percentage value; and thereby generating an altered format for the video data, wherein the altered format is a fast cue or fast review video display...", as recited in combination with other features with respect to independent claim 1; and "...wherein said new threshold level of data is

substantially no more than that corresponding to the single largest frame in said video data bitstream plus a small tolerance percentage value.” as recited in combination with other features with respect to independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kajitani (5,842,046) disclose disk drive system for storing a plurality of I frame non-interlaced with respect to B frames by storing B frames in a separate cylinder.

Yamagishi (5,867,176) discloses method of reproducing pictures by fast forward of backward reproduction from moving picture data coded at high efficiency.
